

## **PRESS RELEASE**

January 21, 2019

### **Solmetex names Kevin Danahy as Solmetex President**

NORTHBOROUGH, Mass. --Solmetex, LLC a leading global provider of amalgam separation technology and dental waste management solutions, is pleased to announce that Kevin Danahy has been named as President, a new position at Solmetex, reporting directly to CEO, Nick Mozzicato. Danahy most recently served as Vice President of Global Emerging Technologies and Specialty Sales at Zimmer BIOMET, and before that served as Vice President of Global Robotics Clinical & Technical Sales. Danahy brings more than 17 years of senior management experience in accelerating revenue growth and building high performance teams to drive long-term success.

"We are all very excited to have Kevin join the Solmetex team. Kevin has an excellent track record of implementing key strategic objectives, as well as, building strong and competent organizations. I am confident he will have a positive impact for our partners, dealers and customers."

~Nick Mozzicato

Effective immediately, Danahy will lead the overall strategy for Solmetex, across sales, marketing, operations, engineering and service efforts. Danahy will be responsible for developing and executing innovative, scalable solutions which will be instrumental in transitioning a fast-growing company to the next level while ensuring operational excellence across the company.

"*'Truly effective and inspiring leaders aren't actually driven to lead people; they are driven to serve them.'* - Simon Sinek. I am truly humbled to join such an amazing dynamic team that has a single focus of delivering a standard of 'Excellence' in all that they do."

~Kevin Danahy

Solmetex has been the industry leader in the manufacturing of amalgam separators for over 20 years within the dental industry, with a primary focus on keeping dental practices compliant with the ever-changing regulatory environment. The Hg5 series of products are ISO 11143 certified, accompanied with a simple recycling and compliance program that meet all existing and new EPA dental regulation requirements on the handling and disposing of amalgam waste within the dental practice.
